COSC345 Cool Group User Testing Questionnaire:

Padraig Carnegie - 6927257, Oliver Kenning - 6594104, Poppy Schlaadt - 6057450, Laura Yoo - 5045964

General User Experience:

Did you find the user interface intuitive and easy to navigate?

Were you able to understand the purpose of the app upon first use?

Were the fonts and text sizes easy to read?

Did you encounter any difficulties while using the app? If so, please describe.

Were you able to easily find and use the necessary features/functions?

How satisfied are you with the speed and responsiveness of the app?

ASL-To-Speech Conversion:

Was the model able to accurately read ASL gestures or signs?

Did the app correctly translate ASL gestures into text?

How accurate and natural did the app's speech synthesis sound?

Were there any instances where the translation or speech synthesis seemed incorrect?

Were you able to customize or adjust the speech synthesis output to your preference?

Flow of Conversation:

Were you able to engage in a flowing, natural conversation using the app?

How well did the app manage to facilitate communication between individuals with hearing issues and those without?

Were there any delays or interruptions that affected the conversation flow?

Accessibility and Usability:

Did the app provide appropriate accessibility features for users with different abilities?

Were the text and speech outputs clear and easy to understand?

Did you feel that the app respected your privacy and security concerns?

Features and Functionality:

Were you able to switch between different languages or accents for speech synthesis?

Was there a conversation history/logging feature? If so, how useful did you find the history or conversation logging feature?

Technical Performance:

Did the app run smoothly on your device and browser?

Did you experience any crashes, freezes, or slow loading times?

User preferences:

How important is customization of the speech output (voice type, speed, pitch, etc.) to you?

Would you prefer the app to offer additional visual cues or feedback during conversation?

Suggestion(s) For Improvement:

Are there any additional features or functionalities you would like to see in the app?

What changes, if any, would enhance your overall experience with the app?

Do you have any suggestions for improving the accuracy of ASL-to-text translation?

Overall Satisfaction:

On a scale of 1-10, how likely are you to recommend this web app to others?

How satisfied are you with your experience using our web app?
